PROFILE SUMMARY

A self-taught individual with strong multitasking abilities and a dedicated work ethic. Possesses effective teamwork, problem-solving and organizational skills. Willing to take on various responsibilities to support the team and known for being a reliable and committed collaborator with a diligent and resourceful approach.

TECHNICAL SKILLS

Frontend Skills : React.js , Redux , HTML , CSS , JavaScript , Ajax , Tailwind , Bootstrap , Figma

Backend Skills : Node.js , Express.js , MongoDB , RESTful API , MVC Architecture , MySQL

Integrations : Multer , Firebase Verification , Razorpay , Fast2sms , Twilio , Sharp , Easy Invoice

Familiar with : Git (Version Control) , AWS , Postman , Data Structures and Algorithms , OOPs Concepts

PROJECTS

E-commerce Website

[Live Link](#) | [Git Repository](#)

- A algorithm-driven e-commerce platform integrates wishlist, cart, payment integration and a standard UI for users.
- Employed **React** for front-end and integrated **Material UI** components to enhance the UI, resulting in a 20% boost in visual appeal and responsiveness.
- Crafted **RESTful API** codes to establish seamless communication between the front-end and back-end systems.
- Utilizing **Node.js** on the backend, **Express.js** integration improved API response times by 20%.
- Ensured efficient and scalable data management by integrating **MongoDB Atlas** as the cloud-based database solution.

E-commerce Website

[Live Link](#) | [Git Repository](#)

- Independently designed, developed and deployed a dynamic e-commerce website with essential features, including add to cart, wishlist, checkout, coupons, payment integration and returns.
- Leveraged **EJS** as the view engine and integrated **Bootstrap** to enhance UI, resulting in a 15% improvement in page load speed.
- Employed **AJAX** for real-time data updates to enhance user experience.
- Utilized **Node.js** on the backend, optimizing API response times by 20% through the integration of **Express.js**.
- Integrated **MongoDB Atlas** as the cloud-based database for robust data management, ensuring efficient and scalable data handling.

MINI PROJECTS

Password Generator

[Live Link](#) | [Git Repository](#)

- Crafted and deployed a dynamic password generator application on **GitHub**.
- The application is built using pure **HTML5** and **CSS** for the user interface and utilizes **JavaScript** for generating and copying passwords.
- The application allows users to create passwords with specific lengths, adding a practical and user-friendly dimension to password generation.

User Management

[Git Repository](#)

- Independently developed a dynamic user management application.
- The project features **EJS** for templating, **Bootstrap** for responsive design, **Express.js** for server-side logic and **MongoDB** for database storage.
- The application is designed with a monolithic architecture to organize backend routes efficiently.

Goal Setter

[Git Repository](#)

- Autonomously created a dynamic goal setter application, User can add profile with image and add goals.
- The project leverages **React.js** and **Redux** the front-end, **Node.js** for the back-end, integrates **Express.js** for server-side handling, utilizes **MongoDB** and **Firebase** for data storage and seamlessly connects the two layers with API calls.

Olx Clone

[Git Repository](#)

- Created a responsive and functional clone of olx and deployed it on **GitHub**. user can login and add product ads, Admin can handle all users at admin side.
- The frontend is completely built using **React** and data handling using **MongoDB** and **Firebase** for the state management utilizes **Redux**.

RESPONSIVE UI CLONES

Netflix UI Clone

[Git Repository](#)

- Autonomously created a 100% responsive UI clone of Netflix and hosted on **Netlify**. Responsive and streams all movie trailers .
- The frontend is completely built using **React** and fetch data from **TMDB**.

Tesla UI Clone

[Live Link](#) | [Git Repository](#)

- Responsive UI clone of Tesla. The application is built using pure **HTML5** and **CSS** for the interface and also utilize **Bootstrap**.
