PERSONAL PROJECTS

- **Enhanced YouTube Replica | link | code**

  A React Project with Tailwind CSS and API Integration .

  – Category-wise Search: Enables users to search videos by categories for efficient content discovery.
  – Related Videos: Suggests related videos using the YouTube API to boost user engagement.
  – Enhanced Dark Theme: Sleek UI design with a dark theme option for optimal viewing in low-light conditions.
  – YouTube API Integration: Real-time video data retrieval for up-to-date content availability.
  – Technology Used:React, HTML, CSS, JavaScript, and Tailwind CSS.

- **BrewDelight: Interactive Coffee E-commerce Website | link | code**

  Stylish Coffee E-commerce with User-Centric Features.

  – Interactive Navbar: The website boasts a highly interactive and user-friendly navigation bar that enhances user experience.
  – The inclusion of a map enhances user engagement by providing a visual representation of the coffee shop's location.
  – Stylish Menu Presentation:Organised menu section showcases the variety of high-quality coffee offerings.
  – Technology Used:HTML, CSS, JavaScript.

- **Google Gemini AI Tool Clone | link | code**

  Creating a Replica of the Google Gemini AI Tool Using React.js

  – Functionality: Implemented a clone of the Google Gemini AI tool using React.js, enabling users to input prompts and receive AI-generated responses.
  – User Interaction: Developed a seamless user interface where users can input prompts or questions, triggering the AI model to generate insightful answers in real-time.
  – Enhanced Navigation: Integrated a collapsible sidebar feature for intuitive navigation, allowing users to easily access different sections of the application while maintaining a clutter-free interface.
  – Historical Record: Implemented a dedicated section to store recently asked questions, providing users with quick access to their previous interactions and facilitating a more personalized experience.
  – HTML for structured interfaces, CSS for aesthetics and responsiveness, JavaScript for interactivity, React.js for dynamic UI.
